

Questionnaire Project

1. Take **six** questionnaires and envelopes.
2. Complete one questionnaire and seal it in an envelope.
3. Ask five other people to complete questionnaires, seal them in envelopes, and give them back to you. These people must **not** be NHS staff or be contacted as patients. They must be aged 18 years or over. We do not have Research Governance or Ethics Committee approval.
4. Bring all six sealed envelopes to the next Research Methods lecture.
